The performance data shown represents past performance. Past performance is not a guarantee of future results. Current performance may be lower or higher than the performance data quoted. The investment return and the principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. For performance information through the most recent month end please call 855.625.7333 or visit thecromwellfunds.com.

Effective on 3/7/22, AMG Managers CenterSquare Real Estate Fund, a series of AMG Funds I (the Predecessor Fund), reorganized into the Fund. Performance shown prior to 3/7/22, is that of the Predecessor Fund. The returns for Investor Class shares are the returns of the Predecessor Fund's Class N shares. Returns of the Investor Class and Institutional Class shares reflect the returns of Classes N and I, respectively, of the Predecessor Fund. Additionally, the Fund has adopted the Financial Statements of the Predecessor Fund. Prior to 2/27/17, outstanding Class S shares of the Predecessor Fund (formerly the Predecessor Fund's sole share class, which was reclassified and redesignated as Class S on 10/1/16) were renamed Class N shares. The Predecessor Fund had the same investment objectives, strategies and portfolio management team as the Fund as of the date of the reorganization.

Investors should carefully consider the Fund's investment objectives, risks, charges and expenses before investing. For this and other information, please call 855.625.7333 or visit thecromwellfunds.com for a prospectus. Read it carefully before investing or sending money.

Mutual fund investing involves risk. Principal loss is possible. The Fund is subject to special risk considerations similar to those associated with the direct ownership of real estate. Real estate valuations may be subject to factors such as changing general and local economic, financial, competitive, and environmental conditions. A greater percentage of the Fund's holdings may be focused in a smaller number of securities which may place the Fund at greater risk than a more diversified fund. Investing in initial public offerings (IPOs) is risky and the prices of stocks purchased in IPOs tend to fluctuate more widely than stocks of companies that have been publicly traded for a longer period of time. Stocks purchased in IPOs generally do not have a trading history, and information about the companies may be available for very limited periods. Market prices of investments held by the Fund may fall rapidly or unpredictably due to a variety of economic or political factors, market conditions, disasters or public health issues, or in response to events that affect particular industries or companies. Companies that are in similar industry sectors may be similarly affected by particular economic or market events; to the extent the Fund has substantial holdings within a particular sector, the risks associated with that sector increase.

Standard deviation is a measure of the dispersion of a set of data from its mean.

The FTSE Nareit All Equity REITs Index is an index of U.S. equity REITs. Constituents include all tax-qualified REITs with more than 50% of total assets in qualifying real estate assets other than mortgages secured by real property. The S&P 500 Index is a capitalization-weighted index of 500 stocks.

Morningstar Risk Rating is an annualized measure of a fund's downside volatility over a 3-, 5-, or 10-year period. This is a component of the Morningstar Risk-Adjusted Return. Morningstar Risk is displayed in decimal format. A high number indicates higher risk and low numbers indicate lower risk. In each Morningstar Category, the top 10% of investments earn a High rating, the next 22.5% Above Average (+Avg), the middle 35% Average, the next 22.5% Below Average (-Avg), and the bottom 10% Low.
