Expense Ratio Gross: 1.39%, Net: 1.07%; Expenses Capped at 1.05%

The Fund's Investment Manager has contractually agreed to waive its management fees and/or reimburse Fund expenses to ensure that Total Annual Fund Operating Expenses (exclusive of taxes, leverage, interest, brokerage commissions, expenses incurred in connection with any merger or reorganization, acquired fund fees and expenses, and extraordinary expenses) do not exceed 1.05% of the Fund's average daily net assets for the Institutional Class shares through at least 1/31/26. Please refer to the prospectus for detailed information.

The performance data shown represents past performance. Past performance is not a guarantee of future results. Current performance may be lower or higher than the performance data quoted. The investment return and the principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. For performance information through the most recent month end please call 855.625.7333 or visit thecromwellfunds.com.

Investors should carefully consider the Fund's investment objectives, risks, charges and expenses before investing. For this and other information, please call 855.625.7333 or visit thecromwellfunds.com for a prospectus. Read it carefully before investing or sending money.

Mutual fund investing involves risk. Principal loss is possible. The Fund invests in foreign securities which involve greater volatility and political, economic and currency risks and differences in accounting methods. Environmental, Social and Governance (ESG) and Sustainable investing may take into consideration factors beyond traditional financial information to select securities, which could result in relative investment performance deviating from other strategies or broad market benchmarks, depending on whether such sectors or investments are in or out of favor in the market. Further, ESG and Sustainable investing strategies may rely on certain values-based criteria to eliminate exposures found in similar strategies or broad market benchmarks, which could also result in relative investment performance deviating. There is no assurance that employing ESG and Sustainable strategies will result in more favorable investment performance. The Sub-Adviser utilizes its own company research, additional external research and the portfolio manager's judgment to determine if a company is contributing positively to sustainable development. Infrastructure companies may be subject to a variety of factors that may adversely affect their business, including high interest costs, high leverage, regulation costs, economic slowdown, surplus capacity, increased competition, lack of fuel availability and energy conservation policies. The Fund is non-diversified and therefore a greater percentage of holdings may be focused in a small number of issuers or a single issuer, which can place the Fund at greater risk. The Fund is new with no operating history. Investing in Master Limited Partnerships (MLPs) involves certain risks related to investing in the underlying assets of the MLPs and risks associated with pooled investment vehicles. Investing in ETFs are subject to additional risks that do not apply to conventional mutual funds, including the risks that the market price of the shares may trade at a discount to its net asset value (NAV), an active secondary trading market may not develop or be maintained, or trading may be halted by the exchange in which they trade, which may impact a Fund's ability to sell its shares.

The S&P Global Infrastructure Index is designed to track 75 companies from around the world that represent the listed infrastructure industry while maintaining liquidity and tradability. An investment cannot be made directly into an index.

Holdings are subject to change and are not a recommendation to buy or sell any security.
